

# EUROPLASTER®

Soft as Suede, Hard as Nails

*Decorative Performance Finishing System*

*Europlaster®* was developed in response to designers and architects for finishing extensive areas to deliver **beauty, improved quality, and truly easy repair for retained vibrancy/freshness and lasting value** as an alternative to ordinary painted walls.

## BEAUTY

Europlaster® imparts a natural warmth, softness and refined sense of substance to architecture. Light plays across its subtly textured surface creating a suede-like luminescence. It is harder than mild steel yet feels soft to the touch.

## DURABILITY

- Repairable – by design to be easy and unnoticeable
- Abrasion/Abuse Resistant – harder than mild steel
- Scrubbable – food stains, dirt etc.
- Water Resistant – bathrooms, kitchens, exteriors
- Crack Resistant – over stable substrates

## INVESTMENT VALUE/ EXTENDED LIFE CYCLE

- Retained Vibrancy/Freshness – 20+ years
- Exterior Life Cycle – 10 to 20 years (partial areas easy to upgrade)
- Alter Color – in future for 25% of original cost

## PRODUCT DESCRIPTION

- Co-polymer acrylic aggregate veneer modified with glazes
- Interior and exterior application
- Hard high performance veneer (*see specifications @ [www.europlaster.com](http://www.europlaster.com)*)
- Integrally colored range of seamless matte textures-Classic Europlaster®, Contemporary Suede Europlaster®, OldeWorld Europlaster®

## SUBSTRATES

- Level 4/5 drywall, plaster
- Level 2 drywall for OldeWorld Europlaster®
- Existing painted surfaces and most primed substrates

## INSTALLATION

- Consistent signature finish with multiple applicators
- Efficient application on complex architectural shapes
- Overcomes unsightly 'cold-joints'
- Coordinates with construction schedules due to application methods and materials
